TROPICAL CYCLONE BULLETIN NO. 6

Tropical Depression "ISANG"

Issued at 5:00 PM, 20 August 2021

Valid for broadcast until the next bulletin at 11:00 PM today

TROPICAL CYCLONE WIND SIGNALS IN EFFECT

No Tropical Cyclone Wind Signal is currently in effect.

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall

"ISANG" is unlikely to directly affect the weather condition and bring heavy rainfall in the country throughout the forecast period.

Severe Winds

The latest forecast scenario for "ISANG" shows that the hoisting of Tropical Cyclone Wind Signals over any land area in the country remains unlikely. Moreover, its passage is unlikely to enhance the Southwest Monsoon nor bring gusty conditions to the country.

HAZARDS AFFECTING COASTAL WATERS

In the next 24 hours, Tropical Depression "ISANG" remains less likely to cause sea conditions within the coastal waters of the country which may be risky to any type of sea vessel.

TRACK AND INTENSITY OUTLOOK

- On the forecast track, "ISANG" will remain far from the Philippine landmass throughout the forecast period. The tropical depression is forecast to move northwestward until tomorrow morning, then turn north northwestward tomorrow afternoon. "ISANG" is likely to exit the Philippine Area of Responsibility Sunday morning or afternoon.
- "ISANG" is forecast to intensify into a tropical storm tomorrow afternoon. It may once again weaken into a tropical depression after passing Ryukyu Islands and the East China Sea by Monday.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

Unless an intermediate bulletin is released, the next tropical cyclone bulletin will be issued at 11:00 PM today.
